# CSCE-312 | Summer 2019

## GRADING SHEET

### Project 6: The Assembler Design

**Grading**

**Project Submission [100%]:** You will be graded for correctness of the assembler program you have designed. You will need to download your submission from eCampus and run your code on the test files. Your program is tested by comparing its output against the output generated by Nand2tetris software (Assembler). The same simulator you will be using to check the ideal output in the course of this project. So, make sure to test and verify your program before finally submitting on eCampus.
